PROFILE

I am a B.Tech 🎓 3rd year Computer Science student with practical experience in building full-stack and frontend web applications. I have worked on projects involving user authentication, data visualization, and responsive UI design, and I am continuously learning backend systems and database management.

EDUCATION

Bachelor of Technology (B.Tech 🎓) – Computer Science

KCC Institute of Technology and Management, AKTU

2023 – 2027

CGPA: 6.8 (70.21%) – till 4th semester

Intermediate (12th)

Board: CBSE

Year: 2023

Percentage: 75%

High School (10th)

Board: CBSE

Year: 2021

Percentage: 92%

CAREER OBJECTIVE

A motivated B.Tech 🎓 3rd year student with a strong interest in software development and problem solving. Seeking opportunities to apply my technical skills, learn industry-relevant technologies, and gain practical experience through projects and internships.

TECHNICAL SKILLS

Programming Languages: C, C++, Java, Python

Web Technologies: HTML, CSS, JavaScript, React (basic)

Backend: Node.js, Spring Boot (basic)

Database: MySQL, MongoDB (basic)

Tools & Platforms: Git, GitHub, VS Code, Postman

Operating System: Windows, Linux (basic)

PROJECTS

PROJECT 1

Stock Portfolio Management Web Application

Technologies: React, Node.js, Express, MongoDB, REST API, Chart Library

- Developed a full-stack web application to manage and track personal stock investments
- Implemented secure user authentication and authorization for individual portfolios
- Enabled users to add and delete stocks with real-time portfolio updates
- Calculated total investment, current market value, and profit/loss dynamically
- Visualized stock price movements using interactive graphs and charts
- Designed RESTful APIs and integrated frontend with backend services
- Deployed the application on cloud infrastructure with a scalable backend setup

PROJECT 2

Spotify and Netflix Frontend UI Clone

Technologies: HTML, CSS, JavaScript

- Developed a responsive frontend clone of the Spotify web interface
- Implemented modern UI components such as navigation bar, playlists, and music cards
- Focused on layout design, styling, and user experience similar to the original platform
- Practiced component-based frontend development and reusable UI design

PROJECT 3

To-Do List Web Application

Technologies: HTML, CSS, JavaScript

- Developed a simple and user-friendly to-do list application for task management
- Implemented features to add, delete, and update daily tasks dynamically
- Used JavaScript for handling user interactions and DOM manipulation
- Designed a clean and responsive user interface using HTML and CSS
- Improved understanding of frontend logic, event handling, and state management

SUBJECTS

Relevant Coursework:

- Data Structures and Algorithms
- Database Management System
- Operating System
- Computer Networks
- Machine Learning
- Design and Analysis of Algorithms

ONLINE COURSES/TRAINING

- Java Programming Masterclass – Udemy
Gained understanding of OOP concepts, collections, exception handling
- React.js – Udemy
Learned component-based architecture, hooks, and frontend integration
- SQL Map from Scratch – Udemy
Practiced writing queries, joins, subqueries, and database concepts
- Machine Learning – Udemy
Studied basic ML concepts such as regression, classification, and model evaluation
- MongoDB – Udemy
Learned NoSQL concepts and CRUD operations
- Generative AI & AI Chatbot Fundamentals – Udemy
Gained exposure to LLMs, prompt engineering, and AI chatbot workflows
- GitHub Copilot – Udemy
Learned AI-assisted coding and productivity improvement techniques

SOFT SKILLS

- Problem Solving
- Teamwork
- Time Management
- Quick Learner
- Communication Skills
